# ULTRA LIGHTS

HIGH-PERFORMANCE BLEACHING POWDER  
FOR NATURAL OR COLORED HAIR

FARCOM  
PROFESSIONAL

## FORMULA with BONDING PLEX TECHNOLOGY

Designed to enhance hair care during the bleaching process, this formula helps protect hair bonds from breakage, preserving elasticity and strength.

BONDING PLEX  
technology

### KEY ADVANTAGES

- Lightens Up to **9** Levels: Provides effective lightening while delivering even, consistent results.
- Uniform, Clean Results: Provides even lightening for a flawless finish.
- Creamy, Thick Texture: Easy to apply with excellent spreadability.

- Faster Action: Accelerates the lightening process for quicker results.
- Non-Volatile: Minimizes the release of airborne particles for a controlled application.
- Vegan Friendly: No animal-derived ingredients, suitable for vegan clients.

### INSTRUCTIONS FOR USE

Use the hair bleaching powder in combination with **FARCOM PROFESSIONAL CREAM DEVELOPER**  
**3% - 10 Vol,**  
**6% - 20 Vol,**  
**or 9% - 30 Vol**  
(depending on the desired lightening level).

#### Mixing Ratio 1:2

Mix **1 part of ULTRA LIGHTS** hair bleaching powder with  
+ **2 parts of FARCOM PROFESSIONAL CREAM DEVELOPER**  
in a non-metallic bowl.

#### Application on natural hair (FIRST-TIME USE) or dyed hair:

- Apply the mixture evenly to unwashed, dry hair. Leave on until the desired lightening level is reached.  
*The processing time varies depending on hair condition and the desired blonde shade. (Maximum recommended processing time: 50 minutes.)*
- Rinse with lukewarm water and apply **BIOPROTEIN Hairplex Bond Saver No2** for 5 minutes. Continue with shampooing.

**DO NOT USE HEAT**

*Do not use heat sources to reduce the processing time.*

#### Application on hair with previous chemical treatments (BALAYAGE, HIGHLIGHTS, ETC.):

- Apply the mixture evenly to unwashed, dry hair. Leave on until the desired lightening level is reached. For full-head lightening techniques that require extended processing time with aluminum foil, it is recommended to use a lower-strength Oxycream.  
*The processing time varies depending on hair condition and the desired blonde shade. (Maximum recommended processing time: 50 minutes.)*
- Rinse with lukewarm water and apply **BIOPROTEIN Hairplex Bond Saver No2** for 5 minutes. Continue with shampooing.

**DO NOT USE HEAT**

*Do not use heat sources to reduce the processing time.*

**TIP:** The lower the strength of the oxidizing cream used in the mixture, the gentler the lightening process. The final result depends on the strength of the CREAM DEVELOPER, the initial hair color, hair quality, and processing time.
